

I am a subscriber of satellite radio. I purchase and pay for the right to listen to commercial free radio just like I pay for cable TV. It is my understanding that the FCC is considering NAB petition 04-160 which could eliminate access to weather and traffic stations.

The only way this would be acceptable would be for someone to open a 24 hour a day weather and traffic station for all of the cities I visit. Otherwise, this service is worth paying for and I have the right to buy it since it is not offering in a 24 hour a day format. This is not unfair competition. This is choice that I have paid for. Please protect my right to purchase this service.

Sincerely,

Mark J Johnson
